

Digital-Traces Forensic Dossier

Phishing / CPA-Fraud Campaign — "Kuota Gratis 81GB Spesial HUT RI ke-81"
Case 2026-08-18 · Consolidated report for abuse reporting (Kominfo/BSSN & providers)

DOSSIER JEJAK DIGITAL — "Kuota Gratis 81GB HUT RI ke-81"

Case 2026-08-18_kuota-gratis-81gb-hutri81 · **Analisis** clown · **Tanggal** 2026-08-18 (GMT+7) Konsolidasi seluruh bukti keras: recon pasif + OTX/passive-DNS + 5 render langsung urlscan.io. Semua tangkapan mentah di `evidence/` (manifest `SHA256SUMS.txt`). Semua interaksi **pasif/read-only**.

1. VONIS

Scam umpan-hadiah viral → funnel arbitrase trafik / CPA pop-ad multi-jaringan. Bukan pencuri kredensial, **tanpa exfiltrasi data, tanpa token Telegram, tanpa APK tetap.** Monetisasi = menjual klik ke jaringan iklan RTB (rotasi antar-partner). Propagasi paksa via gerbang-share WhatsApp.

2. RANTAI SERANGAN LENGKAP (terbukti via render urlscan)

```
Pesan WA → kuota-gratis-81gb98.lgrd.xyz/?hut-ri-81=98 (landing, Cloudflare edge CGK)
├── aset palsu: 626cdn.com (foto/nama/komentar; folder /ID /MY /VN /TH /PH)
├── telemetry: tj.16gift.com/api/event ("tj"=统计 tongji → operator Mandarin)
├── GERBANG SHARE whatsapp://send?text=... (localStorage counter)
└──
  └── /go.php?t=9 → free.gf920.com [CLOAKER: fingerprint Canvas/WebGL/Audio/Font + anti-bot]
      └── hex→ free.gf920.com/?utm_term=<sesi> [stage-2: keputusan]
          └──
              └── SMARTLINK ROTASI PARTNER RTB (bergantung sesi/geo)
                  ├── Varian A: mms.sramms.space/<GUID>?partner_ID=27052 → ld11.com/link?z=... |
                  └── Varian B: srvmediahost.com/nlp/index.php?z=...&url_bnm_redirect= → obj3.com/link?z=... |
                      └──
                          Offer akhir (RTB) → 204 untuk IP datacenter; payload nyata hanya utk IP MOBILE ID + klik valid
```

Bukti rotasi partner (dari 5 render): stage-2 `free.gf920.com` mengirim ke `ld11.com` (scan #3,#4,#5) ATAU `srvmediahost.com` → `obj3.com` (scan #2). Semua ujung **204** dari node datacenter SG → geo-gate final = **IP seluler Indonesia asli**.

3. INFRASTRUKTUR — SEMUA ASET (bukti keras)

3a. Front-end umpan (Cloudflare-fronted, dirotasi)

Aset	Peran	Registrar	Dibuat	Catatan

6. BUKTI KERAS — RENDER LANGSUNG urlscan.io (5 scan, node SG, UA mobile-ID)

#	Target	Hasil	UUID
1	landing	reach 626cdn + tj.16gift.com telemetry	01a01152-4886-778c-85cb-239aff0aa3bc
2	go.php	chain → srvmediahost → obqj3 → 204	01a01156-fd3d-719e-b164-551fa2162c28
3	cloaker	chain → ldl1 → 204	01a01152-4da8-742f-9115-4b876c71bffd
4	mms offer	→ ldl1 → 204	01a01157-0141-772e-871d-1cdeb0c80765
5	ldl1	204	01a01157-04c6-7159-b314-4764f30466fb

JSON + **screenshot** tiap scan di evidence/urlscan/. Screenshot landing = banner "MERDEKA! HUT RI ke-81 — GRATIS 81GB KUOTA", tombol DAPATKAN, social-proof palsu 135K/23K/13K. **Tak ada APK/berkas terunduh di semua scan.**

7. TIMELINE REGISTRASI

2022-03-14	obqj3.com	(ad-network, lama)
2023-12-30	16gift.com	(telemetry, lama)
2026-01-14	gf920.com	(cloaker backbone)
2025-11-11	srvmediahost.com	(cloaker Hetzner)
2026-04-13	sssifmobisignal.com	
2026-05-28	sramms.space	(CPA)
2026-06-02	lgrd.xyz	(landing sekali-pakai)
2026-06-16	626cdn.com	(CDN umpan)
2026-08-17	HUT RI ke-81 → tema "tang4g"	aktif

Pola: backbone lama & stabil (obqj3, 16gift, gf920), umpan baru dirotasi mengikuti momentum.

8. TAKEDOWN / PELAPORAN (target diperbarui)

1. **Cloudflare abuse** (abuse.cloudflare.com) → 1grd.xyz, 626cdn.com, gf920.com/apex, 16gift.com, obj3.com, ldl1.com.
 2. **INAP** → origin 108.178.23.116. **Hetzner** (abuse@hetzner.com) → origin 95.217.42.163 (+6 domain srvmedia.com).
 3. **NameCheap** (abuse@namecheap.com) → srvmediahost.com, sramms.space, obj3.com, sssifmobisignal.com. **west.cn** → 1grd.xyz. **Cloud Yuqu/diymysite.com** → gf920.com/626cdn. **Hefei Juming** → 16gift.com.
 4. **AWS** → CloudFront mms.sramms.space.
 5. **Indonesia**: aduankonten.id (Kominfo) · BSSN/ID-CERT · operator yang dicatat.
 6. Submit semua URL ke Google Safe Browsing; urlscan record (unlisted) sudah ada.
-

9. STATUS PAYLOAD / APK

Tidak tertangkap dari node datacenter (semua 204). Payload hanya untuk **IP seluler ID asli + klik valid**. Infrastruktur karantina siap (`_QUARANTINE_DO_NOT_EXECUTE/` + `tools/safe_fetch_apk.sh` + `tools/dissect_apk_static.sh`); cara menangkap aman di [analysis/sandbox-submission.md](#) & [analysis/payload-analysis.md](#).

10. ADENDUM — Deep-Dive Ronde 2 & 3 (ringkas)

Ronde 2 — analitik & produk kedua (detail: [analysis/deep-dive-round2.md](#)): - **Self-hosted Plausible Analytics** (tj.16gift.com, tj.657g.xyz). ID kampanye internal terbongkar: **id-data01** (funnel kuota), **bot.com** (kuis). - **Produk kedua: Telegram Mini App "Quiz"** (16gift.com/njb/) — scam **earn-to-payout** ("500K+ Withdrawal", "\$300/bulan"), backend `api.php` (ber-`cmd`, kode status 4002), sistem referral `psid`, `payout.php`. Screenshot 05. - Domain baru: 657g.xyz (Dynadot 2026-07-31), plausible.16gift.com.

Ronde 3 — atribusi & korelasi eksternal (detail: [analysis/attribution-and-osint.md](#)): - **Silsilah**: gf920.com (Wayback 2018) = situs judi Mandarin "和信娱乐城" (**Hexin Entertainment City**) — login 账号/密码, 彩票投注. Kontak era-2018: **QQ 752562222**, **WeChat widlc6588**, domain hx1.vip. Aged-domain di-repurpose. Screenshot 04. - **Cross-link cluster**: mediaservingcd.com menautkan origin Hetzner ↔ cluster Namecheap-PHX → **INAP + Hetzner + Namecheap = satu operator**. - **Korelasi eksternal**: **Kemenkomdigi/Kominfo menyatakan HOAKS**; media Indonesia meliput. Varian **data-harvesting** (nama/alamat/Telegram-WA, share 5 grup/15 kontak, pinjol) dilaporkan publik — berbeda dari varian **CPA/RTB** yang dibedah di sini (**multi-varian**, satu tema "81GB"). - **Uji "cari kunci"**: setelah 3 ronde, **tidak ada rahasia terekspos** — opsec operator solid (dotfile 403, listing 403, API ter-gate, dashboard privat, token server-side). Semua analisis **pasif/OSINT**; batas hukum tidak dilewati.

11. Bukti Visual

Galeri lengkap: [SCREENSHOTS.md](#) — landing 81GB, render urlscan, cloaker, situs judi 2018, Telegram quiz.

Semua temuan bertanggal 2026-08-18; jaringan dinamis. Bukti mentah + hash tersedia untuk verifikasi independen.

Deep-Dive Ronde 2 — Lapisan yang Lebih Dalam

Menjawab: "masih ada yang bisa dibedah lebih dalam? bisa dapat key dll?" — Ya, ada beberapa lapis lagi. Hasilnya di bawah. **Tidak ada key/token bocor** (opsec operator solid), tetapi kita membuktikan **infrastruktur & produk baru** yang signifikan.

1. Analitik: self-hosted Plausible (bukti niat komersial + ID kampanye)

tj.16gift.com/js/script.js = skrip **Plausible Analytics** self-hosted (signature `currentScript + data-api + /api/event + "Ignoring Event"`). POST `tj.16gift.com/api/event` membawa:

```
{ "n": "pageview", "u": "https://kuota-gratis-81gb98.1grd.xyz/?hut-ri-81=98", "d": "id-data01", "r": null }
```

- **data-domain = id-data01** = nama "site" internal operator untuk kampanye kuota (skema: `id=Indonesia`, `data`, `01` → ada `id-data02`, `my-data01`, `dst`).
- Dashboard `plausible.16gift.com` ADA tapi **tidak publik** (403 / "not found" untuk stats) → operator memantau performa, tapi statistik tidak bocor.

2. PRODUK KEDUA: Telegram Mini App "Quiz" (scam hadiah/referral)

16gift.com/ (root) = **Telegram Mini App** — memuat `telegram.org/js/telegram-web-app.js`, membaca `Telegram.WebApp.initDataUnsafe.user + start_param`, lalu memanggil backend:

```
GET 16gift.com/njb/api.php?cmd=get_user_info&uid=<tgid>&psid=<ref>&first_name=...&lang=...
```

- **Backend nyata:** `njb/api.php` dengan skema perintah (`cmd=`) + kode status → `{ "ok": false, "status": 4002, "msg": "Parameters error" }` (butuh `initData` Telegram valid; ter-gate).
- **Sistem referral:** `psid` diambil dari `start_param` (16 char pertama) → skema rujukan/undang-teman.
- **Alur:** `start_param=wallet` → `payout.php`; `=test` → `intro.php`; selain itu → `index.php`. Adanya **payout.php** menandakan iming-iming "penarikan saldo" (pola scam `earn-to-payout`: tugas/undang-teman → saldo palsu → syarat penarikan).
- Telemetri kuis: `tj.657g.xyz/js/script.js` dengan **data-domain = "bot.com"** (nama site Plausible untuk produk kuis).

3. Domain/infra baru ronde ini

Aset	Peran	Registrar	Dibuat	Host
16gift.com (root)	Telegram Mini App quiz + backend <code>njb/api.php</code>	Hefei Juming (CN)	2023-12-30	Cloudflare
tj.16gift.com	Plausible telemetry (kuota, site <code>id-data01</code>)	—	—	Cloudflare
plausible.16gift.com	Plausible dashboard (403, privat)	—	—	Cloudflare
657g.xyz / tj.657g.xyz	Plausible telemetry (kuis, site <code>bot.com</code>)	Dynadot	2026-07-31	Cloudflare
zs.obqj3.com	subdomain ad-network (<code>crt.sh</code> ; tak merespons)	NameCheap	2022-03-14	—

4. Uji "cari key" — hasil (opsec operator)

Cek	Hasil
<code>/.git/config</code> , <code>/.git/HEAD</code> (INAP)	403 (diblok)
<code>/.env</code> , <code>/.well-known/security.txt</code> (INAP)	403
<code>.env/.git/config.php/admin</code> (Hetzner)	200 kosong (catch-all cloaker, bukan file nyata); <code>/vendor/</code> 403
<code>njb/api.php</code>	JSON ter-gate <code>status:4002</code> (tanpa <code>initData</code> valid)
<code>njb/</code> , <code>njb/cdn/</code>	403 (listing diblok)
<code>njb/index.php/intro.php/payout.php</code>	404 tanpa sesi Telegram valid
dashboard Plausible	tidak publik
token Telegram / API key di client	tidak ada

➡ **Tidak ada rahasia terekspos.** Operator menerapkan opsec konsisten (dotfile 403, listing 403, API ter-gate, secret server-side). Bot token Telegram ada **server-side** (untuk memvalidasi `initData` via HMAC) — tak pernah muncul di klien.

5. Kesimpulan ronde 2

- Operator ini **multi-produk & profesional**: (a) funnel CPA "kuota gratis" + (b) **scam hadiah/referral Telegram Mini App**, berbagi **infra analitik Plausible** & pola telemetry `tj.<domain>`.
- Skema penamaan kampanye internal terungkap: `id-data01` (kuota), `bot.com` (kuis) → memungkinkan pelacakan kampanye lain.
- **Atribusi Mandarin** menguat: registrar `16gift.com` = Hefei Juming (CN), pola `tj` = 统计.
- **Tidak ada "kunci"** untuk diambil — bukan karena kurang gali, tapi karena **opsec mereka rapi**. Jalur realistis menembus lebih jauh = level hukum/penyedia (bukan teknis dari luar).

Bukti: `evidence/telegram-quiz/` (`16gift_quiz.html`, `main.js`), `respons api.php`. Snapshot 2026-08-18.

Atribusi & OSINT — Lapisan Terdalam

Deep-dive ronde 3: OSINT pasif (Wayback, passive-DNS, media, feed) — **tanpa** serangan aktif. Menghasilkan bukti atribusi terkuat + korelasi eksternal.

1. LINEAGE — `gf920.com` = situs judi Tiongkok "和信娱乐城" (2018)

Wayback Machine (snapshot 2018-08-05) membuktikan `gf920.com` dulunya **portal login judi/lotre online Mandarin**: - Judul: 和信娱乐城 (Héxìn Yúlèchéng / "Hexin Entertainment City"), grup 和信集团娱乐城. - Form login: `name="userName"` (账号/akun), `name="userPwd"` (密码/sandi), `name="loginVcode"` (captcha 看不清?点击更换), `name="loginHTML"`. - Konten: 彩票投注 (taruhan lotre), 会员 (member), QQ, 微信 (WeChat). - URL historis berbahasa Mandarin: /账号 (account), /密码 (password), /验证码 (OTP).

Arti: cloaker backbone kampanye (`free.gf920.com`, 2026) **berakar dari infrastruktur judi online Tiongkok** (2018). Domain aged di-repurpose. Ini menempatkan operator di **ekosistem gambling/CPA-affiliate berbahasa Mandarin** — cocok dengan registrar Tiongkok (west.cn, Hefei Juming), telemetry `tj=统计`, dan pola cloaking→CPA. Bukti: `evidence/wayback/gf920.com_2018_hexin-gambling-login.html` · screenshot `screenshots/04_gf920_2018_hexin-gambling-login.png`.

Identifier operator era-2018 (dari arsip publik): halaman itu mencantumkan kontak agen/afiliasi: - **QQ**: 752562222 (代理加盟QQ / agen-afiliasi) - **WeChat**: `widlc6588` (微信) - **Domain "mudah diingat"**: `hx1.vip` (易记域名; "hx"=和信/Hexin) - Menu lengkap situs judi: 彩票投注 (lotre), 真人视讯 (live casino), 电子游戏 (slot), 体育竞技 (sport), 存款取款 (depo/wd), 加盟合作 (afiliasi), 零审核极速提款 ("QUICK WITHDRAWAL").

Catatan kehati-hatian: identifier ini milik **era judi 2018** domain tsb. Operator 2026 me-*repurpose* domain; identitas bisa sama atau berbeda. Dicatat sebagai **lead OSINT historis**, bukan atribusi final individu.

Produk Telegram "Quiz" (screenshot 05) = scam "Play & Win / Withdrawal" (earn-to-payout): klaim "500K+ Withdrawal Amount", "Easy monthly income \$300", bukti-bayar palsu "@Putri123 was just paid 609.56 to their Venmo" — memakai **pola nama palsu "Putri" yang sama** seperti scam kuota (`names` cookie) → memperkuat kaitan satu operator.

`16gift.com` (Wayback 2012): dulunya toko hadiah/bunga Tiongkok (`FlowerOnline`, ASP) → domain aged di-repurpose jadi telemetry+Telegram-quiz. Aged domain = reputasi lebih baik untuk lolos filter.

2. Cluster Hetzner diperluas + CROSS-LINK ke cluster sekunder

OTX passive-DNS `95.217.42.163` → ~16 domain "media/serv/track". Liveness (2026-08-18): - **Hidup di 95.217.42.163 (Hetzner)**: `baitech1.com`, `doubletrk.com`, `smartmediasrv.com`, `srvmediahost.com`, `srvmedianet.com`, `srvnewmedia.com` (6, HTTP 200). - `mediaservingcd.com` → `104.219.250.37` = **cluster Namecheap Phoenix** (yang sebelumnya kita temukan dari origin INAP!) → **membuktikan origin INAP, Hetzner, dan Namecheap-PHX satu operator** (penamaan "media" & "srv" konsisten). - `openvisiting.com` → Cloudflare (403, hidup). Sisanya NODNS (dirotasi keluar). - Nama menonjol: `letsdothisbrutus.com`, `mefediaagency.com`, `progmediaserve.com` (codename/agency-style).

3. Korelasi eksternal — kampanye SUDAH dikonfirmasi otoritas

Media & pemerintah Indonesia telah mengonfirmasi scam ini (pencarian publik): - **Kemenkomdigi (Kominfo) menyatakan HOAKS** — "Kuota Gratis 81 GB Spesial HUT RI". - Liputan: akurat.co, Tribun (Kaltim/Priangan), RRI, Pikiran Rakyat, NETIZ, dll. - Modus dilaporkan: minta **nama/alamat/info Telegram & WhatsApp**, syarat **share ke 5 grup / 15 kontak**, pelaku **mengumpulkan database nomor aktif** untuk transaksi ilegal / **pinjol** tanpa izin; risiko **WhatsApp dibajak**.

Nuansa penting: laporan publik menyebut varian **pengumpul data (data-harvesting/phishing)**. Varian yang KITA bedah teknis (`1grd.xyz`→cloaker→CPA) **tidak** meng-exfiltrate data — ia dimonetisasi via **RTB/CPA**. → Kampanye "81GB" punya **beberapa varian** dengan monetisasi berbeda (data-harvesting DAN ad-fraud), kemungkinan dari operator/kit yang sama atau afiliasi berbeda. Keduanya nyata & berbahaya.

4. Konteks industri (cloaking-as-a-service)

Pola kita (fingerprint JS + anti-bot + RTB rotasi) konsisten dengan **Cloaking-as-a-Service (CaaS)** yang didokumentasikan peneliti (mis. Varonis "1Campaign", Malwarebytes). Cloaker menyajikan halaman bersih ke scanner, konten nyata ke korban — persis perilaku `free.gf920.com`.

5. Batas (etika/hukum) — tidak dilewati

Menembus lebih jauh (menebak `api.php`, akses dashboard Plausible, banner-grab intrusif, kompromi server) = **serangan aktif/ilegal**, di luar lingkup. Semua di atas **pasif/OSINT**. Token bot Telegram & kredensial dashboard tetap server-side → tidak dapat (dan tidak boleh) diambil dari luar. Jalur nyata berikutnya = **pelaporan** (draft siap) agar penyedia/aparat menindak.

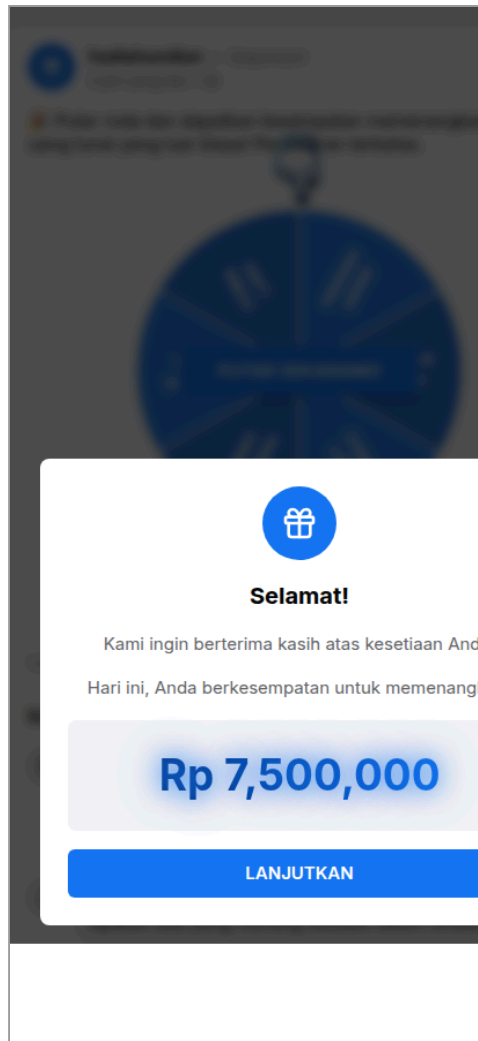

Lampiran A — Galeri Bukti Visual
